

Webinar: Treatment and Issues for Triple Negative Breast Cancer

Thursday, May 14, 8-9 pm (NY time)

Open to people nationwide who have or have had triple negative breast cancer. Pre-registration is required.

To register, call Support Connection, 914-962-6402 or 800-532-4290.

Join us for this educational program that will cover the following topics pertaining to Triple Negative Breast Cancer (TNBC).

- Recent changes in standard of care therapy.
- The use of chemotherapy in patients who are found to have residual breast cancer.
- Post neoadjuvant therapy and the use of immunotherapy, both in the early stage and metastatic settings.
- Some of the novel treatment strategies that are under investigation for the treatment of patients with metastatic TNBC.

There will be a question and answer period following the presentation. The program will be moderated by a Support Connection Peer Counselor.

SPEAKER

**Ayca Gucalp, MD, Assistant Attending, Breast Medicine Service
Memorial Sloan Kettering Cancer Center**

Dr. Gucalp is a medical oncologist with a clinical practice dedicated exclusively to the care of patients diagnosed with breast cancer. Her research activities are focused on the development of novel therapeutic strategies for the treatment of triple negative breast cancer (TNBC). She has conducted several prospective therapeutic trials enrolling patients with TNBC, including a pivotal study establishing the potential role of anti-androgen receptor (AR) agents in the rare TNBCs that are AR-positive.
